Junior Robotics - Fall

21st Century Robotics Enrichment using LEGO® bricks. Each {YEL!} Junior Robotics class follows four basic components:

- **Teach It!**... Each class students are taught the basic STEM engineering concepts behind each project;
- **Build & Program It!**... Students use LEGO® bricks to build an alligator, race car and more.
- **Program It!**... Then they program that project to race, chew, make noise and more using drag-and-drop icon-based software.
- **Play It!**... Finally they play with their project, modify it, create extensions and have fun working with it.
